Skills

Rust | TypeScript | WebAssembly | PostgreSQL | Kubernetes | Go

Education

B.S. Computer Science

Oregon State University, 2014

Languages

English (native)

Spanish (professional)

Profile

Software engineer with ten years of experience building fast, reliable systems. I like small teams, clear interfaces and code that is easy to delete.

10 yrs
in production systems

50M
events a day, one pipeline

-40%
p99 latency after the rewrite

Experience

Staff Engineer, Northwind Data

2021 to present

- Led the design of a streaming pipeline that handles fifty million events a day.
- Cut p99 latency by forty percent with a custom allocator and lock-free queues.

Senior Engineer, Brightside Labs

2017 to 2021

- Built a multi-tenant platform that serves eight thousand customers.
- Moved a monolith to services and cut deploys from forty-five minutes to three.

Software Engineer, Orion Systems

2014 to 2017

- Wrote firmware for IoT sensors in C and Rust.
- Shipped the cloud SDKs that three enterprise customers adopted in the first year.

Selected projects

tinyqueue
A lock-free queue for Rust, used by four open-source projects.

pgwatch
A small tool that explains slow PostgreSQL queries in plain words.

Edge cache talk
Gave a conference talk on tail latency and what causes it.

Mentoring
Mentor in a program that places career changers in engineering roles.
